

## LYNK Devices with New I/O Boards

---

LYNK devices with new I/O boards do not require an NPC cable or a DEX Adapter Kit (regardless of machine type).

### How to Identify a LYNK with a new I/O Board:

LYNK devices with a new I/O board display a “New I/O Board” message upon startup and should have a green “OK P0” sticker on the back of the device.

**Alternatively**, check the part number (P/N) printed on the back of the device:

New I/O board part numbers:

- 16006071
- 16006073
- 16007077
- 16007078
- 16007076 (**EXCEPTION:** still requires NPC cable)
