

Regulation Compliance

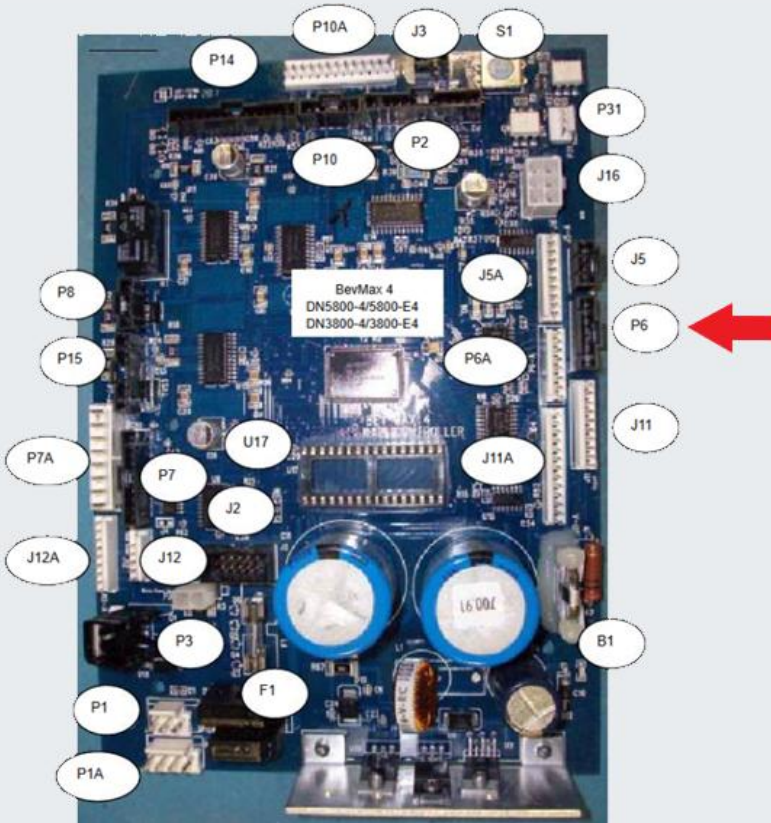

To comply with regulations on displaying two prices on vending machines, GlobalConnect recommends that all Operators immediately perform these tasks:

On Vending Machine:

1. **Remove** prices from all coils and trays
2. **Remove** all stickers that suggest a different price or a discount with cash or loyalty.
3. **Unplug / disable** the **digital display** (certain boards can hide price checks without affecting other features). Contact the machine manufacturer for assistance.

EXPLICIT CAUTION: GlobalConnect suggests **disabling** a digital display's price check feature if the display is temporarily powered on during a service visit.

Disabling Digital Display on Vending Machines
